CM12229

# MONA

TABLE S - PC950

Download

### COMPONENTS INCLUDED WITH UNIT:

1× assembled light  
1× hex key size  
1× cotton gloves  
1× installation manual

When unpacking the light, do so with regard  
for its material composition – the main components are made of glass.

Wear the cotton gloves included with the light  
when unpacking and assembling it.

### WARNING:

**The manufacturer assumes no liability for  
damage resulting from incorrect assembly.**

**This light is intended for interior use only.**

**The light source must be replaced  
by a qualified person only.**

**The power cable must be replaced  
by a service technician only.**

**The power disconnect is the cable with plug.  
The electrical outlet must be located near  
the light and easily accessible.**

**Installation time: 10 minutes / 1 person**

### CLEANING THE GLASS

**BROKIS upholds only the highest possible quality standards. Prior to shipping, the light undergoes several quality controls and stages of cleaning. Because transportation, storage, and the amount of time that passes between packing at our plant and subsequent unpacking by the client can affect the light in different ways, we strongly recommend cleaning it prior to assembly.**

**The glass must first be rinsed in warm water, and a dish detergent may be used to remove all foreign particles, dust, and grease. Repeat the process if necessary and then dry the glass thoroughly with a paper towel.**

**Recommendation: Do not use mineral spirits, highly concentrated thinners, or other substances not intended for use on glass surfaces. Do not use any cleaning agents containing silicone, as they may leave a film and attract dust and smudges.**

**PRIOR TO SHIPPING, THE FUNCTIONALITY OF EACH LIGHT AND ITS COMPONENTS IS THOROUGHLY TESTED. THE MANUFACTURER ASSUMES NO LIABILITY FOR THE MISHANDLING OF PRODUCTS.**

## 1. SWITCHING ON THE LIGHT

Plug the light into an electrical outlet and switch it on. Verify that it works properly. Brightness can be adjusted by touching the metal parts of the light.

## 2. DISASSEMBLING THE SHADE/LIGHT SOURCE

Use the hex key to loosen the set screw in the metal fixture and remove the shade with light source.

### 3. REMOVING THE OUTER CAP

Use the hex key to loosen the set screw in the outer cap of the light source and remove the cap.

#### 4. REMOVING THE OUTER CAP

Use the hex key to loosen the set screw in the other outer cap of the light source and remove the cap.

## 5. REMOVING THE LIGHT SOURCE LOCKING CYLINDER

Use the hex key to loosen the set screw in the inner cap of the light source. Next, remove the locking cylinder by pulling it out of the shade while holding the light source in place.

## 6. REMOVING THE LIGHT SOURCE

Remove the light source from the glass shade.

## 7. INSTALLING THE LIGHT SOURCE

Position the light source in the glass shade so that it fits neatly in the holes. If the light source is loose in the holes, add another seal, position it in the holes again, and check for a snug fit.

## 8. INSTALLING THE LOCKING CYLINDER

Insert the aluminium locking cylinder through the hole in the glass and into the light source until the dimple in the cylinder is aligned with the set screw in the inner cap.

## 9. INSTALLING THE OUTER CAPS

Press the outer caps over the locking cylinders until flush against the glass. The rounded cap goes on the end of the light source without the connector. The open cap goes on the end with the connector. Tighten the set screws while gently pressing the caps against the glass.

## 10. INSTALLING THE SHADE

Position the shade with light source on the metal fixture and secure in place with the set screw.
