PROTECTION COVERS

For each item a cover is available that protects the furniture against dirt. These covers in grey colour are made of PU coated polyester which is water-repellent and UV-resistant. Thanks to their excellent breathable qualities the covers reduce condensation and heat build-up, helping to prevent the formation of mold and mildew. Nevertheless, they are not 100% waterproof. Always make sure that furniture, cushions and covers are completely dry before covering furniture.

MAINTENANCE

Braiding and Frame

Rinse the braiding regularly with clean water. For intensive cleaning, use Synthetics Super Cleaner (D9922). This cleaner also works perfectly for the powdercoated stainless steel frame. Always rinse the furniture with clean water after treatment with Tribù cleaning agents. Allow the braiding to dry and treat with Textile Protector (D9924). This will apply an invisible repellent film which enables the furniture to dry quicker and reduces the adhesion of dirt, stains and pollution. The cleaning will become easier, less frequent and requires mainly rinsing with clean water.

Table top Ceramic

Ceramic is very easy to maintain with clear water and a pH-neutral soap. Stubborn stains can be removed with Glass & Ceramic Cleaner. To protect the ceramic, Ceramic Protector can be used. This applies a highly water and soiling repellent coating, which also makes the surface brighter, smoother and easier to clean.
